

HOW TO CLEAN ELECTRIC STOVE

TOP

HOW TO ELECTRIC COOKTOP - STEP-BY-STEP PROCESS

Step 1: Detach the burners from the stove.

Step 2: Sprinkle some baking soda on the burners. It will act as a mild scrubbing agent and deal with stubborn, baked-on food residues.

Step 3: Pour a few spoons of vinegar on the burners.

Step 4: Wait for the vinegar and baking soda to stop sizzling. It should take around 15 minutes. Use a sponge or piece of cloth to scrub the burners.

Step 5: Use a towel to dry the burners, then reattach them.

Note: Never submerge your burners in water while cleaning them, despite what anyone else might tell you. Water can ruin vital electrical connections that allow your burners to do their job seamlessly.

HOW TO CLEAN ELECTRIC STOVE BURNERS

Step 1: Mix a cup of white vinegar with a cup of hot water. You can add a few drops of dishwashing liquid, Spray the solution on your stovetop, then wipe it with a microfiber cloth.

Step 2: Spritz clean water on the stovetop and wipe it one last time with a paper towel or clean cloth. Give the appliance approximately 15-30 minutes to dry.

Note: You don't have to deep-clean your cooktop every time you use it. You can do it once or twice a week. In between, use a damp, soft rag to clean your stovetop and remove any stains after cooking. Never let stains sit on your stovetop for too long because they'll become baked-on.
